

Curriculum Vitae

Chen, Ruiqi

School of EECS, Peking University
Intelligent Science and Technology

Website: rq-Chen.github.io

EDUCATION

Bachelor of Science | Peking University 2017.9 - 2021.7

- Major: Intelligence Science and Technology
- Overall GPA: 3.59/4.0 Last term's GPA: 3.70/4.0
- English skills: GRE 338 (AW 4) , TOEFL 106 (Speaking 24)

RESEARCH EXPERIENCE

IDG/McGovern Institute for Brain Research | Tsinghua University 2019.7 - Present

- **Advisor:** Prof. [Hong, Bo](#) (PI)
- **EEG Oddball Experiment ([Link](#))**
 - Designed and performed an EEG oddball experiment with Psychtoolbox
 - Conducted event-related potential (ERP) analysis with EEGLAB
 - Successfully replicated the MMN/P300 effect
- **EEG Functional-Connectivity-Based Microstates Analysis ([Link](#))**
 - Recorded long-time EEG signal from 5 subjects resting/listening to a story/listening to music, with eyes open or closed
 - Conducted k-means clustering based on voltage distribution or functional connectivity pattern
 - Analyzed results with mathematic tools including dynamic general linear model, multidimensional scaling, unsupervised learning, and silhouette evaluation ([Codes](#))
 - Discovered the functional-connectivity-based equivalent of the classic EEG microstates
 - Established the link between the proportion/transition probability/connection strength of a specific microstate and activity of the Default Mode Network under different task conditions
 - Explored the interaction between alpha oscillation and microstates' internal dynamics

IDG/McGovern Institute for Brain Research | Peking University 2019.3 - Present

- **Advisor:** Prof. [Luo, Huan](#) (PI)
- **EEG data analysis practice ([Link](#))** 2019.3
 - Implemented an inverted encoding model based on an EEG visual working memory experiment
 - Reconstructed the tuning curve for the orientation of two Gabor stimuli
 - Practiced MATLAB programming and multivariate pattern analysis

- **Project: The representation of time and order in working memory ([Link](#))** 2019.4 – Present
 - Wrote an intensive review about the temporal organization in working memory and another for the computational models and functions of neural oscillation in working memory ([Link](#))
 - Designed an EEG experiment to explore the neural mechanism underlying the manipulation of contents in auditory working memory and collected data from 16 subjects ([Codes](#))
 - Replicated the ERP result in ([Albouy et al., Neuron, 2017](#))
 - Working on the time-frequency analysis currently ([Codes](#))

PROGRAMMING PROJECTS

Course Project: Visualization of NSFC Funding 2018 ([Link](#)) 2019.10

- Visualized the *National Natural Science Foundation of China* (NSFC) funding allocation with SVG
- Revealed the hidden disparity in NSFC funding allocation among different higher education institutions and among different regions in China
- Practiced front-end programming (HTML/CSS/JavaScript, all self-taught within one week)
- Acquired visualization skill (with D3.js) for high-dimensional big data (e.g., EEG signal) analysis

ACTIVITIES

Summer Program for Neural and Cognitive Science | Tsinghua University 2019.8

- Learnt about the principles, methodology and frontiers of neuroscience ([Details](#))

RELEVANT COURSES

Neuropsychology (96/100)

- Anatomy, function and diseases of the cortex and thalamus

The Brain and Cognitive Science (92/100)

- Sensation and perception, learning and memory, language, etc.

Probability Theory and Statistics (90/100)

- Central limit theorem, parameter estimation, hypothesis testing, ANOVA, regression, etc.

Experimental Psychology (90/100)

- Experiment design, psychophysical methods, sensation and perception, memory, etc.

Computational Neuroscience (89/100)

- Hodgkin-Huxley equations, E-I balanced network, continuous attractor network, etc.

SKILLS

- **Programming:** C/C++, Python, MATLAB, HTML/CSS/JavaScript, SVG (with D3.js)
- **EEG experiment:** Psychtoolbox programming, EEG recording
- **EEG data analysis:** ERP, time frequency analysis, multivariate pattern analysis, dynamic general linear model, unsupervised clustering, phase coupling analysis
